

*CICERO Learning ([www.cicero.fi](http://www.cicero.fi)) is a network for distinguished researchers and research groups on learning. The primary members of the network are based in different universities and research institutes in Finland. The network builds co-operation with research groups and units around the world. CICERO Learning Network promotes cutting edge research on learning across the boundaries between diverse scientific fields. The network aims to nurture academic innovations and synergies among research communities, businesses and industry, for the benefit of the Finnish society in particular and global community in general. CICERO Learning Network was established in 2005 and is coordinated by the University of Helsinki, Finland.*

*Visci (Virtual Intelligent Space for Collaborative Innovation) ([www.visci.fi](http://www.visci.fi)) and Visci Tools are projects which aim to produce scientific knowledge and develop new enabling technology for collaborative innovation and learning by applying a user-centric approach. The project team is multidisciplinary and includes researchers from University of Helsinki, Helsinki University of Technology and Helsinki Institute for Information Technology HIIT. CICERO Learning Network acts as the coordinator for the Visci project and a partner in the Visci Tools project. The projects are funded by the Academy of Finland and Tekes (the Finnish Funding Agency for Technology and Innovation).*

CICERO Learning Network at the University of Helsinki invites applications for the post of

## Project Researcher

fixed-term position for 1.2.2010 - 31.12.2012 (for the duration of the project).

The project researcher works for the Visci and Visci Tools projects. The main tasks of the Project Researcher include gathering and analyzing research data, participating in user-centric design, participating in the organisation of project events and reporting of results in international and national scientific conferences and journals.

The successful candidate holds a Master's degree, has knowledge of some of the disciplines in the project, of multidisciplinary research collaboration and has experience of user-centred design. Fluent English is seen as beneficial. It is also recommended, that the candidate is or plans to be a doctoral student at the University of Helsinki.

Salary of the post will be based on the Finnish universities' pay scales for teaching and research staff, level 2-4. On top of the basic salary there will be a wage element based on the personal skills level of the successful applicant. For more information on the post and remuneration please contact VISCI Project Coordinator, Juha Kronqvist, +358 41 466 0309, [juha.kronqvist@taik.fi](mailto:juha.kronqvist@taik.fi).

Applications should be addressed to Kristiina Kumpulainen, Research Director of Visci research consortium and sent together with attachments (CV and a list of publications) to Registry, University of Helsinki, PO Box 33 (Yliopistonkatu 4), 00014 UNIVERSITY OF HELSINKI, FINLAND. **Deadline for applications is Tuesday 8 December 2009 at 3.45pm.**
